This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. INTRODUCTORY.

THIS Supplement embraces the additions to the Library since 1873. It contains the titles of more than 10,000 books and brings up the total number of volumes on the shelves to over 26,000.

The present year will close the first quarter of a century of the Library's existence, and it seems fitting that an undertaking of so considerable importance should be contemporaneously executed.

The entire work of compiling manuscript and superintending printing has been carried out by Miss Bean, the Librarian, in a manner most satisfactory to the Trustees, and it is a gratification to them to lay before the Town what they believe to be an admirable specimen of catalogue work.

It is hoped that the new facilities for using the Library, hereby afforded, will greatly increase its ability to furnish instruction and amusement to the people of the Town who have supplied the means for the publication of this volume.

NOTE.

This supplementary catalogue has been compiled upon the same general plan as its predecessor, but with fuller references and more frequent use of *title* entries. These have been made in the belief that the former will be of special assistance to students, and the latter to that mass of readers, who, oftenest remembering books by title, consult a catalogue for titles rather than for authors and subjects.

It must be borne in mind that this volume does not represent the whole library, but only such books as have been added since November, 1873.

The shelf-numbers are to be found in the right-hand margin of each page, and are designed specially to facilitate the delivery of books. A list of these numbers sends the assistant to the *precise location* of each book required, and the work is accomplished without delay; whereas a list of titles, imperfectly remembered and suggesting the location only in a general way, fails entirely to do so, and causes in the aggregate a great loss of time.

All works marked R. L. or L. C. belong to the reference department, and are not to be taken from the library, except by special permission of the Trustees.
